Model: BW-MP1

www.bitzwolf.com

Due to continuous improvement, actual product may differ slightly from what is shown in the manual. Manual is for reference only.

Safety Reminder

1. Please read this manual carefully before using.
2. Use only the standard power cable to ensure stable power supply.
3. Do not look into the lens while the projector is working.
4. No cloth, blanket or other material that could cover ventilation holes should be placed around the projector while it is operating.
5. Avoid contact with water or other liquids as this will damage the projector.
6. Projector should be stored and operated in a clean and dry environment.
7. Please disconnect the power supply when not in use.
8. Package with original foam packaging or other shockproof material during transportation.

Product Details

Input Interface

Remote

Do not mix use old and new batteries. For long term storage please remove batteries. Remote should be pointed at the projectors IR receiver.

Focus/Keystone

Solution
Rotate the keystone correction nut 2, until image is corrected. The keystone correction angel is ± 15°

Solution
Re-position the projector to be parallel with the projecting surface.

Note: It will be difficult to focus when the LED light is not vertically projected to the wall, thus we highly recommend you to settle the projector flat.
